

We're on Tap to Help Clients Protect our Most Precious Natural Resource — Florida's Water Supply.

Water supply and quality are essential to most elements of life and business in Florida, and Dean Mead attorneys are involved in every aspect. We're at the forefront of statewide water issues involving policy, supply, permitting, compliance, conservation and management to help our clients navigate the changing tides of new laws and regulations. Whether it is applying for a consumptive use or environmental resource permit, certifying a public utility, developing a dispersed water project, working with compliance and reporting issues in the urban or agricultural context, or working with clients on new ways to improve water quality, Dean Mead attorneys have been deeply involved with Florida's water issues for 40 years.

Our attorneys advise and represent farmers, landowners, developers and utilities across Florida in all types of water matters. Here are some examples:

- Environmental Resource and Consumptive Use Permitting
- Public Utilities Infrastructure and Rate Matters
- Water and Wastewater Treatment and Reuse
- Water Quality and Supply Regulations, Reporting and Compliance Issues
- Zoning & Land Use Matters and Challenges
- Public-Private Partnerships to Construct Infrastructure and Create Alternative Water Supply
- Impact of Central Florida Water Initiative Efforts
- Water Policy, Regulation and Legislation Impacting Florida Springs
- Water Rights Litigation and Administrative Law Challenges
- Landscape Conservation Easements that Improve Water Supply and Quality
- Representation Before Agencies of USDA such as NRCS
